

CLASSROOM SPOTLIGHT

Seventh Grade

It has been a busy spring for the seventh graders at Holy Family! In math, the students planned virtual road trips, “traveling” across the United States within a budget. The students also became teachers themselves as they presented “How To” demonstrations on many topics such as making graphic t-shirts, whipping up smoothies or using sign language.

The seventh graders were also a part of a Lenten embryology project that is shared with the entire school. In cooperation with the Florida Cooperative Service and the University of Florida, this project provides an opportunity to experience how life develops by observing eggs that have been set in incubators. Father Tim visited the seventh grade classes and discussed the Catholic Identity of the embryology project. He highlighted that human life must be treated with dignity and respect, and it includes the life of the unborn.

What's Cool About Seventh Grade?

Heard in the Halls...

"The teachers are great!"
"Taking care of the baby chicks was a lot of fun!"

Mrs. Toth has been a teacher at HFCS for 8 years, teaching Pre-Kindergarten and middle school math. She has devoted the past 4 years to teaching 7th and 8th grade Math, and is a 7th grade homeroom teacher. She began her teaching career at Resurrection and has been a teacher for 16 years. In her free time, Mrs. Toth enjoys walking her two dogs, swimming, cooking, going to the beach and reading.

Mrs. Salom has been a teacher at HFCS for 10 years, teaching Spanish and Science. She is also a 7th grade homeroom teacher. After working as a Structural Engineer, she began her teaching career at a university in Venezuela where she taught Physics. She has 15 years of teaching experience. When not teaching, Mrs. Salom enjoys walks with her dog, cooking, going to the movies, and traveling around the world.
