

HFCS Water Bottle Guide

Hydration is an important complement to developmental health. With refillable water bottle stations throughout the school, our school policy allows for children to carry water bottles throughout the day.

From our handbook:

Students may carry water bottles throughout the school day. All water bottles must be clear with a secure twist-on top and students may not carry other drinks in their water bottles. A clear Nalgene style bottle is recommended.

Below is a guide for parents and teachers as to appropriate water bottles at school.

Disposable water bottles are not suggested due to their lack of durability and environmental impact.

GOOD

Clear wide-mouth and durable

BAD

Not clear, can't easily see that student is drinking something other than water.

Decoration or logo doesn't hide contents of bottle

Insulated bottles are completely opaque and so are not suitable

Secure twist-top and no-mess drinking spout

As above, doesn't provide clarity.

Another secure twist-top and no-mess drinking spout

Decoration is okay, but lid isn't screw-top

OTHER GOOD CHOICES
